

## HAND PALLET TRUCKS

### Hand Pallet Truck Mod. TM52

This pallet truck has a payload of 2.500 kg (or 3.000 kg if the upgraded version is used) and forks available of different sizes, accordingly to the pallet's dimension or the typology of materials needed to move.

This pallet truck is very quiet and greatly reduces the efforts required to the operator during typical work-day operations. Our model is also equipped with a valve of overload which protects the metal structure from damages in case of excessive overload.

The following models are available:

- galvanized
- stainless steel
