

SMALL FORKLIFT FLATBED

Small Forklift Flatbed

These flatbed are designed and manufactured for the horizontal and vertical handling of heavy and bulky loads.

With capacities up to 45,000 kg they are ideal for all those sectors, such as metallurgical or heavy carpentry, where the handling of bulky loads is required without sacrificing agility and maneuverability.

The dimensions of the platform can be customized according to the volume and characteristics of the goods to be transported and be equipped with wheels suitable for any type of flooring to operate both indoors and outdoors.
